EDUCATION

University of California, Riverside (UCR)

Master of Science in Computer Engineering

Apr 2026 – Apr 2028

Riverside, CA

University of California, Riverside (UCR)

Bachelor of Science in Computer Engineering

Sep 2021 – Jun 2025

Riverside, CA

EXPERIENCE

Software Engineering Intern

National Aeronautics and Space Administration (NASA)

Aug 2026 – Present

Hampton, VA

- Develop a comprehensive framework for modernizing legacy PHP code in the NASA Earth Science Strategic Integration Environment (NESSIE) for PHPUnit test and evaluation targeting 100% code coverage.
- Establish a robust CI/CD pipeline and technical documentation within the Flight Systems Software Branch to standardize automated test execution, ensuring the reliability of mission-critical data for Earth science portfolios.

Research Assistant (UIUC SRSE 2026)

University of Illinois Urbana-Champaign (UIUC)

Jun 2026 – Present

Remote

- Develop core framework components for AEBench, a benchmark for evaluating AI agents on artifact evaluation tasks, building a shared runtime to execute versioned research cases and record reproducible results.
- Engineer automated Python evaluation pipelines that compare agent outputs against reference data by utilizing statistical analysis methods, producing objective technical assessments of agent performance.

Director

Change in Scientific Importance for Youth (Delta SIFY)

Oct 2022 – Jun 2025

Riverside, CA

- Founded and led the Highlander Invitational, UCR's annual Science Olympiad competition, coordinating a team of 300 volunteers to scale the event into the Inland Empire's largest STEM tournament with over 2,000 students.
- Directed the Science Olympiad Coaching Program at Riverside STEM Academy, recruiting, onboarding, and managing the weekly schedules of 25 volunteers to mentor a group of 50 middle school students.

Technology Director

The Highlander Newspaper

Sep 2022 – Jun 2025

Riverside, CA

- Engineered hardware and network infrastructure for UCR's student-run newspaper, providing on-demand technical support and workflow training to ensure minimal downtime during weekly production.
- Devised a website optimization strategy centered on content delivery optimization, reducing website latency by 82.8% and growing readership by 73.3% to 40,000 monthly average users (MAUs).

PROJECTS

Scansheet | *Rust, Tauri, JavaScript, React*

Oct 2025 – Jun 2026

- Developed a full-stack attendance management system that eliminates manual entry errors through an automated QR code scanning infrastructure, reducing administrative overhead in educational settings.
- Engineered comprehensive data portability tools to streamline data management, including bulk CSV imports, date/category filtering, customizable PDF reports, and automated badge generation for users.

SKILLS

Languages: Python, Java, C, C++, C#, Rust, JavaScript, TypeScript, SQL, MATLAB, Verilog, VHDL, Assembly

Frameworks: React, React Native, Next.js, Express.js, Angular, Flutter, Electron, Tauri, PyTorch, TensorFlow

Developer Tools: Git, GitHub Actions, Docker, Kubernetes, PostgreSQL, MongoDB, WSL, CMake, GDB, QEMU

EDA and Simulation Tools: PSpice, Capture CIS, Vivado, ModelSim, Synopsys Custom Compiler, GTKWave
